

Health Innovation

Passionate & Objective Partner. Independent Expert. Trusted Ally.

The healthcare industry is undergoing an unprecedented period of change and growth. Today's healthcare environment calls for new approaches, strategies, and partnerships. Noblis Center for Health Innovation is passionate about making a difference to meet our nation's need for change. We address this need through advisory services, applied research and innovative solutions that endure.

Adding Value to the Healthcare Community

Much of the work we do involves solving specific problems for individual healthcare organizations and agencies. In addition, as an organization dedicated to contributing to the public good, we also use our expertise to develop solutions and knowledge that can benefit the entire healthcare community through our applied research and knowledge dissemination.

A Culture of Collaboration

Our collaboration with you starts with our respect for your insights. No one knows more about your organization's day-to-day and long-term challenges or understands more about your business than you do. We begin every engagement by taking the time to really listen to you. The result: truly creative, lasting solutions that work.

An Integrated Approach

We bring impartiality and critical thinking to each assignment. Our multi-disciplinary teams of forward thinking experts leverage years of practical experience and "best practices". We strive to address issues and concerns with effectiveness, efficiency, and real-world practicality - hallmarks of our organization. This enables us to deliver innovative strategies and approaches that both address immediate needs and positioning for future healthcare challenges. Noblis' combined skills and expertise help our clients achieve their mission of providing quality healthcare having a unique perspective of the public and private sectors of the healthcare environment.

Public Sector Healthcare

Whether helping our Federal clients transform healthcare delivery for millions of beneficiaries, or working at the State and local levels of government, our dedicated team of professionals brings the same level of commitment, integrity, and expertise to each project.

Areas of expertise in which we proudly support our clients includes clinical care design, health information technology, systems engineering, problem solving, acquisition strategies, enterprise architecture, organizational integration and transformation, strategic and tactical planning, and project management.

RASMAS

Noblis has transformed how providers address product alerts and improved the quality and efficacy of healthcare in the United States. RASMAS is a recall management service that improves patient safety, reduces risk exposure, and identifies cost recovery opportunities for product alerts that may impact the health and well-being of patients, visitors, or staff.

RASMAS subscribers have access to web-based tools designed to support enterprise management of each alert. Subscribers also have direct access to a community of thousands of healthcare professionals who have a keen interest in mitigating the risk of defective products.

Private Sector Healthcare

We assist health organizations in the private sector achieve their missions by a systematic approach to strategic thinking and planning, supported by innovation and improvement of business and clinical processes, information management and facilities planning.

Our professionals work with clients to develop tailored strategies and plans that maximize their ability to succeed. Spanning the full spectrum of strategy and planning services, we bring sound and sustainable solutions to clients through dynamic processes that examine the range of strategic issues.

We work collaboratively with clients to improve performance through innovatively redesigned or new processes, enabled and supported by changes in technology, facilities, and people.

CHI Research

Our responsibility to clients and the public includes developing and disseminating healthcare knowledge derived from applied and translational research for the larger health community. This research, conducted in collaboration with other agencies, associations, universities and clients, is published in leading health journals and presented at major healthcare conferences.
