Noblis' Mile Corrigan Named Finalist for Women in Technology Award

Leadership Award Recognizes Women for their Unique Vision and Talent in Technology

FALLS CHURCH, Va.— April 8, 2011—Noblis is pleased to announce that Women in Technology (WIT), the premier organization contributing to the success of professional women in the Washington, D.C. area technology community, has named Mile Corrigan, Manager, Noblis, as a finalist in the 12th Annual Women in Technology Leadership Awards.

This annual awards program honors leading female professionals working in the Greater Washington D.C. metropolitan area who have “exemplified unique vision and talent in the technology industry” during the previous year. Ms. Corrigan was nominated in the Green IT category.

“Each nominee illustrated exceptional talent and achievements as a woman leader in the technology industry,” said Nanci Schimizzi, president, WIT. “Although the decision-making process was difficult, we are excited to honor these finalists who are forging ahead and clearing the path for others to make an unprecedented impact on the technology industry.”

Ms. Corrigan earned the WIT nomination for her work with Noblis' Center for Sustainability. Her accomplishments include being co-inventor of numerous web-based software tools, including the [General Services Administration \(GSA\) Carbon Footprint and Green Procurement Tool](#) and the [GSA Sustainable Facilities Tool](#); acting as guest editor for [The Green Federal Enterprise](#) issue of Noblis' journal, *Sigma*; and mentoring staff and interns.

According to Noblis Senior Manager, Robert Wassmann, “Ms. Corrigan serves as a stereotype-breaking role model. Her strong leadership skill, technical superiority, and keen business sense make Ms. Corrigan a triple threat.”

WIT will recognize its 46 finalists across 12 categories and announce the winners at their Leadership Awards Banquet on May 19, 2011.

About Women in Technology

Women in Technology (WIT) is a not-for-profit organization with the mission of advancing women in technology—from the classroom to the boardroom—by providing advocacy, leadership development, networking, mentoring and technology education. With nearly 1000 members in the Washington, D.C.-area, WIT strives to meet its vision of being the premier organization empowering women to be architects of change in the technology industry.
