## **Noblis' Mile Corrigan Wins Green IT Leadership Award from Women in Technology**

*Award Recognizes Women for their Unique Vision and Talent in Technology*

**FALLS CHURCH, Va.**—May 20, 2011—Noblis is pleased to announce that Women in Technology (WIT), the premier organization contributing to the success of professional women in the Washington, D.C. area technology community has named Mile Corrigan, Noblis manager, as the Green IT winner in the 12th Annual Women in Technology Leadership Awards.

This annual awards program honors leading female professionals working in the Greater Washington D.C. metropolitan area who have “exemplified unique vision and talent in the technology industry” during the previous year. The award winners were announced at a WIT Leadership Awards Banquet on May 19, 2011.

Winners were chosen from a field of nominees that “illustrated exceptional talent and achievements as a woman leader in the technology industry,” said Nanci Schimizzi, president, WIT. These are women “who are forging ahead and clearing the path for others to make an unprecedented impact on the technology industry.”

Ms. Corrigan earned the WIT award for her work with Noblis' Center for Sustainability. Her accomplishments include being co-inventor of numerous web-based software tools, including the [General Services Administration \(GSA\) Carbon Footprint and Green Procurement Tool](#) and the [GSA Sustainable Facilities Tool](#); acting as guest editor for [The Green Federal Enterprise issue of Noblis' journal, Sigma](#); and mentoring staff and interns.

“Ms. Corrigan’s leadership, drive, creativity, and her recent accomplishments clearly demonstrate why she is deserving of this award,” said Robert Wassmann, Noblis senior manager. “Her strong leadership skill, technical superiority, and keen business sense make her a triple threat.”

Noblis provides expert technical and advisory services in systems engineering, science and technology, program management, and acquisition services to government and industry. We work in essential areas, such as national security, transportation, healthcare, environmental sustainability, and enterprise services, to solve complex scientific, systems, process, and infrastructure problems in ways that benefit the public. We are honored to support organizations with critical national responsibility, including the General Services Administration, Department of Homeland Security, Federal Aviation Administration, Centers for Medicare & Medicaid Services, Department of Labor, and the National Oceanic and Atmospheric Administration.

### **About Women in Technology**

Women in Technology (WIT) is a not-for-profit organization with the mission of advancing women in technology—from the classroom to the boardroom—by providing advocacy, leadership development, networking, mentoring and technology education. With nearly 1000 members in the Washington, D.C.-area, WIT strives to meet its vision of being the premier organization empowering women to be architects of change in the technology industry.
